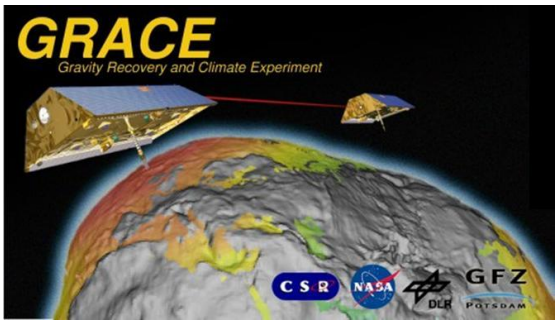
GRACE Science Data System Monthly Report August 2009



Prepared by:
Frank Flechtner GFZ flechtne@gfz-potsdam.de

Contributions by:
Srinivas Bettadpur UTCSR srinivas@csr.utexas.edu
Mike Watkins JPL michael.m.watkins@jpl.nasa.gov
Gerhard Kruizinga JPL gerhard.kruizinga@jpl.nasa.gov

Approved by:
Byron Tapley UTCSR tapley@csr.utexas.edu

Highlights:

- CSR has generated and delivered RL04 Level-2 products for July 2009, GFZ and JPL for June and July 2009.
- The GFZ RL04 Level-2 gravity field for December 2008 (GSM-2_2008336-2009001_0029_EIGEN_G---_0004) has been updated at PODAAC on September 22 as the product due to unknown reasons did not contain C21/S21 drift rates. The product at ISDC was (and is) correct.
- The 2nd GRACE Hydrology Workshop will be held the day before the science team meeting in Austin on November 4. More info is available at http://neptune.gsfc.nasa.gov/hsb/index.php?section=188

Satellite Science Relevant Events:

- Operations in Science Mode throughout the month except for the periods highlighted in the L1B Data Processing section below.
- The GRACE-1 Brouwer mean orbital elements on September 1, 2009 00:00:00 are as follows:

  A [m] = 6838063.934
  E [-] = 0.001652
  I [º] = 89.025078
- The satellites separation was 205 km on September 1, 2009 with a rate of +0.67 km/d. Orbit maintenance maneuver won't be needed for some months.

Level-0 raw data dump reception statistics at DLR ground stations Weilheim and Neustrelitz:

GRACE-A Housekeeping:	99.9 %	GRACE-B Housekeeping:	100.0 %
GRACE-A Science:	100.0 %	GRACE-B Science:	100.0 %

Level-1 Data Processing:

- Level-1B Release 01 instrument data have been processed at JPL and archived at GRACE-ISDC and JPL PO.DAAC. Please refer to the statistics below.
- **Notes:**
    - On 2009-08-06 at 15:15:30 the GRACE-B secondary star camera rate dropped from 1 Hz to 0.2 Hz. This drop did not cause any loss of KBR1B data but the attitude SCA1B data may be degraded due to lower sampling rate of the secondary camera. The nominal 1Hz secondary star camera rate was restored by a power cycle of the GRACE-B IPU on 2009-08-10 at 13:12
    - For 2009-08-07 see note 2009-08-06
    - For 2009-08-08 see note 2009-08-06
    - For 2009-08-09 see note 2009-08-06
    - For 2009-08-10 see note 2009-08-06
    - On 2009-08-24 a GRACE-A IPU reboot at 15:24 caused a gap of 6 minutes in the SCA1B data. During the KBR prefit check it was determined that the integration of the ACC1B data did not return a valid solution due the gap in the SCA1B data. All level1B data are considered nominal but the Level-2 processing may need to process the data in two data arcs.
    - On 2009-08-25 GRACE-A experienced a K-0.75Ka jump at 06:56:08.25. In general these jumps are associated with an unknown time tag offset in the KBR1B product. At 23:51:14 the K and Ka trackers were commanded to reacquire the signal to remove any possible time tag offset. The KBR1B data from 06:56:08 till 23:51:14 are considered off nominal and caution should be use when using this data in the Level-2 processing.
    - On 2009-08-26 04:17:41 an ACC bias jump occurred on GRACE-A in the Science Reference Frame linear Y-axis and in the angular Z-axis. The ACC1B data was corrected by adding a bias of 6.09597239836148 10^{-9} m/sec^2 prior to 04:17:41. The angular Z-axis was not corrected. The linear ACC1B data are considered nominal and should be used in the level-2 gravity field determination processing

- **KBR statistics:**

  A) KBR1B product name

  B) Total arc length with data (hours)

  C) Number of observations used in residual calculation

  D) KBR-GPS range residual RMS (cm)

  E) minimum KBR-GPS range residual (cm)

  F) maximum KBR-GPS range residual (cm)

  G) number of continuous segments in the KBR product

A	B	C	D	E	F	G

2007												
2008												
2009												

- The software to convert from GRACE GPS1x format to Rinex format has been updated to handle the presence of data from PRN32 since Feb. 26, 2008. Users should download and re-install the entire Level-1 Read software suite (RELEASE_2008-03-20) from the GRACE archives. This software is backwards compatible and can process all mission data.
- L1B De-aliasing Products Status (for details see AOD1B Product Description Document):
    - Release 01: Generation has been stopped June 30, 2007.
    - Release 03: Generation has been stopped January 31, 2007.
    - Release 04: Generated until September 10, 2009 and extended to 1976-2000 (see newsletter for December 2008).
    - Quality statistics for Release 04 products are online available at http://www.gfz-potsdam.de/pb1/op/grace/results (follow link “GRACE Atmosphere and Ocean De-aliasing Statistics).
    - Following AOD1B products are publicly available (yellow: RL01, RL03 and RL04; green: RL01 and RL04, blue: RL04 only):

Level-2 Product Generation and Distribution:

- Besides historical CSR RL01, GFZ RL03 and JPL RL02 time-series (see below) and more experimental releases which are only available to the GRACE Science Team the following RL04 L2 products are presently available to the public (green: available, yellow: in preparation; red: missing due to accelerometer data problems):

  - **GFZ:** GSM solutions for August 2002 until July 2009. July 2004 until October 2004 and December 2006 are also available as constrained solutions (*GK2-*). Corresponding background GAA, GAB, GAC and GAD products and calibrated errors (GSM*.txt) have been provided too. Details are listed in the GFZ L2 Release Notes.

GFZ RL04	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2002

2004												
2005												
2006												
2007												
2008												
2009												

- GFZ has stopped RL03 processing (Feb 2003 until Jan 2007 available at the archives. For further details refer to the GFZ RL03 release notes for Level-2 products).
- CSR has stopped RL01 processing. (Apr. 2002 until Dec 2006 available at the archives. For further details refer to the CSR RL01 release notes for Level-2 products).
- JPL has stopped RL02 processing (January 2003 until November 2005 available at the archives. For further details refer to the JPL RL02 release notes for Level-2 products).
- TN05 containing C20 estimates derived from SLR and using GRACE RL04 standards is periodically updated.

Miscellaneous:

- Registration is now open for the next GRACE Science Team Meeting, to be held on November 5-6, 2009, in Austin (see http://www.csr.utexas.edu/grace/GSTM/). Attendees are urged to register as soon as they know they will be attending. The registration fee is US $125, payable as before with either checks or credit cards. Please note carefully the modes of payment in advance, and on site.
- A list of GRACE related publications which can be sorted by author or date is available at http://www.gfz-potsdam.de/pb1/op/grace/index_GRACE.html under item “Publications” (current status: 452 papers). This list is regularly updated and maybe incomplete. If you are missing a publication please send an e-mail to Frank Flechtner (flechtne@gfz-potsdam.de).
- Science data users are encouraged to submit citations of their own and other works related with GRACE to the bibliography web page implemented at PO.DAAC: http://podaac.jpl.nasa.gov/grace/bibliography.html.
