Approved by:
Byron Tapley UTCSR tapley@csr.utexas.edu

gerhard.kruizinga@jpl.nasa.gov

Highlights:

- GFZ has generated and delivered RL04 Level-2 products for July 2011.
- Generation of CSR RL04 Level-2 products for July 2011 is nearly finished. Users are requested to check the archives in the next few days for this new model.
- The GRACE satellites have passed the β'=0 event on June 16. Consequently, the accelerometers had already been turned off on June 6 (GRACE-B) and June 7 (GRACE-A), respectively, in order to manage the battery use. The accelerometers have been successfully switched on again on July 4 (GRACE-A) and June 29 (GRACE-B), respectively. Please recall that the remainder of the data (KBR, GPS & star camera) has been collected routinely all along and has now been declared public (as well as the January 2011 data). The actual mission status can be monitored at

http://www.csr.utexas.edu/grace/operations/mission_status/.

Satellite Science Relevant Events:

- Operations in Science Mode throughout the month except for the periods highlighted in the L1B Data Processing section below.
- The GRACE-1 Brouwer mean orbital elements on August 1, 2011 00:00:00 are as follows:

A[m] = 6832432.169

E[-] = 0.001438 $I[^{\circ}] = 89.007081$

• The satellites separation was 184 km on August 1, 2011 with a rate of -0.83 km/d. Next orbit maintenance maneuver will be necessary approximately mid of August 2011.

Level-0 raw data dump reception statistics at DLR ground stations Weilheim and Neustrelitz:

GRACE-A Housekeeping: 100.0 % GRACE-B Housekeeping: 100.0 % GRACE-A Science: 100.0 % GRACE-B Science: 100.0 %

Level-1 Data Processing:

• Level-1B Release 01 instrument data have been processed at JPL and archived at GRACE-ISDC and JPL PO.DAAC. Please refer to the statistics below.

• Notes:

- o On 2011-06-06 GRACE-B ACC was powered off at 22:47 to reduce the battery load. This means no nominal gravity processing is possible after 22:47.
- o For 2011-06-07 see note 2011-06-06. GRACE-A ACC was powered off at 13:56 to reduce the battery load. After 13:56 both accelerometers are powered off and are expected to be powered on at the end of June or early July (see below).
- On 2011-06-29 GRACE-B ACC was powered on at 09:07:56. Large ACC bias gradients are observed after the power on lasting for about 4 days. ACC biases stabilized on 2011-07-05 00:00:00. The ACC data in this period cannot be used directly in the nominal gravity field processing. Furthermore GRACE-A ACC was powered off during this period as well.
- o For 2011-07-01 see notes 2011-06-29 and 2011-06-07
- o For 2011-07-02 see notes 2011-06-29 and 2011-06-07
- o On 2011-07-02 multiple GRACE-B IPU reboots caused a 50 minute KBR1B data loss.
- o For 2011-07-03 see notes 2011-06-29 and 2011-06-07
- On 2011-07-04 GRACE-A ACC was powered on at 04:32:40. Large ACC bias gradients are observed after the power on lasting for about 4 days. ACC biases stabilized on 2011-07-09 00:00:00. The ACC data in this period cannot be used directly in the nominal gravity field processing. See note 2011-06-29
- o For 2011-07-05 till 2011-07-08 see note 2011-07-04

• KBR statistics:

- A) KBR1B product name
- B) Total arc length with data (hours)
- C) Number of observations used in residual calculation
- D) KBR-GPS range residual RMS (cm)
- E) minimum KBR-GPS range residual (cm)

F) maximum KBR-GPS range residual (cm)

G) number of continuous segments in the KBR product

• Following JPL RL00 (yellow) and RL01 (green) L1B products are publicly available. June and July 2002 (red) are not provided due to accelerometer problems. See also comment in the Highlights Section. For January and June 2011 (blue) no accelerometer data are available (see corresponding newsletters).

| L1B data | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec |

- The L1B Read software has been updated to accommodate 64-bit machines but the software will also work on 32 bit machines. Please change RELEASE_2008-03-20 to RELEASE_2010-03-31 available at ftp://podaac.jpl.nasa.gov/allData/grace/sw/.
- L1B De-aliasing Products Status (for details see AOD1B Product Description Document):
 - o Release 01: Generation has been stopped June 30, 2007.
 - o Release 03: Generation has been stopped January 31, 2007.
 - Release 04: Generated until August 7, 2011 and extended to 1976-2000 (see newsletter for December 2008). Quality statistics for Release 04 products are online available at http://www-app2.gfz-potsdam.de/pb1/op/grace/results (follow link "GRACE Atmosphere and Ocean De-aliasing Statistics).
 - o Following AOD1B products are publicly available (yellow: RL01, RL03 and RL04; green: RL01 and RL04, blue: RL04 only):

| AOD1B | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec |

Level-2 Product Generation and Distribution:

- Besides historical CSR RL01, GFZ RL03 and JPL RL02 time-series (see below) and more
 experimental releases which are only available to the GRACE Science Team the following
 RL04 L2 products are presently available to the public (green: available, yellow: in
 preparation; red: missing due to accelerometer data problems):
 - o GFZ: GSM solutions are available for August 2002 until May 2011. July 2004 until October 2004 and December 2006 are also available as constrained solutions (*GK2-*, reason is GRACE 4d repeat orbit and GPS anomaly on GRACE-B, respectively). October 2008 until September 2010 are also available as unconstrained solutions up to degree and order 60 (*GM60*, reason is GRACE 7d repeat orbit). Corresponding background GAA, GAB, GAC and GAD products and calibrated errors (GSM*.txt) have been provided too. Details are listed in the GFZ L2 Release Notes.

| GFZ RL04 | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec |

| 2011 | | | | | | | | | | | | |

- GFZ has stopped RL03 processing (Feb 2003 until Jan 2007 available at the archives. For further details refer to the GFZ RL03 release notes for Level-2 products).
- CSR has stopped RL01 processing. (Apr. 2002 until Dec 2006 available at the archives. For further details refer to the CSR RL01 release notes for Level-2 products).
- JPL has stopped RL02 processing (January 2003 until November 2005 available at the archives. For further details refer to the JPL RL02 release notes for Level-2 products).
- . TN05 containing C20 estimates derived from SLR and using GRACE RL04 standards is periodically updated.

Miscellaneous:

- The Proceedings of the Grace Science Team Meeting at GFZ in Potsdam on 11/12 November 2010 are online available at http://www.gfz-potsdam.de/portal/gfz/Neuestes/ Veranstaltungen/Tagungen+und+Konferenzen/2010-Conferences/GSTM-2010/proceedings
- The following acknowledgement shall be added to any new GRACE related publication (paper, poster etc.): Acknowledgement: We would like to thank the German Space Operations Center (GSOC) of the German Aerospace Center (DLR) for providing continuously and nearly 100% of the raw telemetry data of the twin GRACE satellites.
- A list of GRACE related publications which can be sorted by author or date is available at http://www.gfz-potsdam.de/portal/gfz/Struktur/Departments/Department+1/sec12/projects/grace/grace_publications (current status: 801 papers). This list maybe still incomplete. If you are missing a publication please send an e-mail to Frank Flechtner (flechtne@gfz-potsdam.de).
- Science data users are encouraged to submit citations of their own and other works related with GRACE to the bibliography web page implemented at PO.DAAC: http://podaac.jpl.nasa.gov/grace/bibliography.html.
