Highlights:

- CSR, GFZ and JPL have generated and delivered RL05 Level-2 products for January 2014 (based on only 16 days, see Level-1 Section below).
- GFZ has generated and delivered RL05a Level-2 products for November and December 2013.
- GFZ has generated RL05a Level-2 products for April, May and August till December 2002, but these products have still not yet passed quality control. Further information will be provided in the next Newsletter.
- GFZ has generated and delivered new GAE and GAF Level-2 products in terms of Technical Notes TN08 and TN09. The coefficients may be used to correct discontinuities in atmospheric pressure data on January 29, 2006 and January 26, 2010, respectively. Details are described in chapter 3.7 of the updated AOD1B Product Description Document Version 4.1 which is, as the Technical Notes, available in the ISDC and PO.DAAC documents section.
- The next GRACE Science Team Meeting is planned at GFZ in Potsdam between September 29 and October 2, 2014. Further information will follow in summer.

Satellite Science Relevant Events:

- Operations in Science Mode throughout the month except for the periods highlighted in the L1B Data Processing section below.
- The actual mission status can be monitored at http://www.csr.utexas.edu/grace/operations/mission_status/.

- The GRACE-1 Brouwer mean orbital elements on January 31, 2014 00:00:00 are as follows:
A [m] = 6801721.014
E [-] = 0.001142
I [°] = 89.020762
- The satellites separation was 245 km on January 31, 2014 with a rate of -0.60 km/d. The next orbit maneuver will be needed about mid of May 2014.

Level-0 raw data dump reception statistics at DLR ground stations Weilheim and Neustrelitz:

GRACE-A Housekeeping:	100.0 %	GRACE-B Housekeeping:	100.0 %
GRACE-A Science:	100.0 %	GRACE-B Science:	100.0 %

Level-1 Data Processing:

- Level-1B Release 02 instrument data have been processed at JPL and archived at GFZ ISDC and JPL PO.DAAC. Please refer to the statistics below.
- RL02 Notes:
 - On 2014-01-08 from 5:50 to 12:16:30 the GRACE-B spacecraft was in attitude hold mode. The Level-1 data is degraded during this time interval.
 - On 2014-01-17 at 11:50:24 the GRACE-A KBR was powered off to reduce the battery load, which resulted in the interruption of the KBR1B data. The KBR1B data will resume once both KBR systems are powered back on late February 2014.
 - KBR statistics:
 - A) KBR1B product name
 - B) Total arc length with data (hours)
 - C) Number of observations used in residual calculation
 - D) KBR-GPS range residual RMS (cm)
 - E) minimum KBR-GPS range residual (cm)
 - F) maximum KBR-GPS range residual (cm)
 - G) number of continuous segments in the KBR product

Following JPL RL02 L1B products are publicly available (green). June and July 2002 and June 2003 (red) are not provided due to accelerometer problems. For several months a significant number of Level-1 data is not available (blue): January and June 2011 (accelerometer data), May and October 2012, March and August 2013 (accelerometer and K-Band data), and January 2014 (K-Band data). RL00 and RL01 production has stopped with December 2004 and April 2012, respectively. See also corresponding newsletters.
