

# GRACE Science Data System Monthly Report

## September 2017

Prepared by:  
Frank Flechtner      GFZ      flechtne@gfz-potsdam.de

Contributions by:  
Srinivas Bettadpur      UTCSR      srinivas@csr.utexas.edu  
Gerhard Kruizinga      JPL      gerhard.kruizinga@jpl.nasa.gov  
Christoph Dahle      GFZ      dahle@gfz-potsdam.de

Approved by:  
Byron Tapley      UTCSR      tapley@csr.utexas.edu

### Highlights:

- No RL05 Level-2 products could be generated and delivered for September 2017 due to insufficient amount of Level-1B data (see also section Level-1 Data Processing).
- The GRACE Science Team Meeting took place in Austin, Texas, between October 10 and 12. Proceedings will be made available shortly on the UTCSR GRACE web page at <http://www2.csr.utexas.edu/grace/GSTM>.

### Satellite Science Relevant Events:

- Operations in Science Mode throughout the month except for the periods highlighted in the L1B Data Processing section below.
- The actual mission status can be monitored at [http://www.csr.utexas.edu/grace/operations/mission\\_status/](http://www.csr.utexas.edu/grace/operations/mission_status/).
- The GRACE-A Brouwer mean orbital elements on September 30, 2017 00:00:00 are as follows:  
 $A[m] = 6690950.800$   
 $E[-] = 0.000180$   
 $I[^\circ] = 88.984510$
- The satellites separation was 522.8 km on September 29, 2017 with a rate of -48.8 km/d.

## Level-0 raw data dump reception statistics at DLR ground stations Weilheim and Neustrelitz:

GRACE-A Housekeeping:	100.0 %	GRACE-B Housekeeping:	100.0 %
GRACE-A Science:	100.0 %	GRACE-B Science:	100.0 %

## Level-1 Data Processing:

- Level-1B Release 02 instrument data have been processed at JPL and archived at GFZ ISDC and JPL PO.DAAC. Please refer to the statistics below.
  - On 2017-06-29 GRACE-A MWA and ACC were powered off at 13:40:09 to reduce power load. MWA and ACC continued to be powered off for complete July, August and September 2017.
  - On 2017-09-13 GRACE-A performed 3 maneuvers in order to decrease the separation to GRACE-B
  - On 2017-09-14 GRACE-A performed 12 maneuvers in order to decrease the separation to GRACE-B
  - On 2017-09-15 GRACE-A performed 7 maneuvers in order to decrease the separation to GRACE-B
  - On 2017-09-25 GRACE-A performed 2 maneuvers at 23:00 and 23:45 in order to decrease the separation to GRACE-B
- RL02 Notes:
  - KBR statistics:
    - A) KBR1B product name
    - B) Total arc length with data (hours)
    - C) Number of observations used in residual calculation
    - D) KBR-GPS range residual RMS (cm)
    - E) minimum KBR-GPS range residual (cm)
    - F) maximum KBR-GPS range residual (cm)
    - G) number of continuous segments in the KBR product

Following JPL RL02 L1B products are publicly available (green). June and July 2002 and June 2003 (red) are not provided due to accelerometer problems. For several months a significant number of Level-1 data is not available (blue): January and June 2011 (accelerometer data), May and October 2012, March and August 2013 (accelerometer and K-Band data), January and February 2014 (K-Band data), July 2014, December 2014, and May/June 2015, October-December 2015, April 2016, September/October 2016, February 2017 and July/August 2017 (accelerometer and K-band data). RL00 and RL01 production has stopped with December 2004 and April 2012, respectively. See also corresponding newsletters. For several months sufficient K-band data are available to produce a monthly solution, but transplant GRACE-A accelerometer data had to be used on GRACE-B. These months are marked in yellow.

## Level-2 Product Generation and Distribution:

Level-2 products for the mission period after November 2016 have been generated using synthetic GRACE-B ACC1B R3 data as described above and other routine mission data. We believe that users whose analysis domain is smaller than 750-km radius will see considerably more noise than they would have in the mid-mission data (up to 2010); and noticeably more noise than they would have through 2015-16 data. At spatial scales longer than 750 km, the products since November 2016 are slightly degraded relative to the Level-2 products from earlier in 2016. The Level-3 mascon or gridded data products derived from the project Level-2 gravity field models may be more suited for use at smaller spatial scales.

Besides historical RL00 till RL04 and GFZ's RL05 time-series (see below) the following RL05 L2 products are presently available to the public (green: available, red: missing due to accelerometer data or accelerometer and K-band data problems, yellow: based on transplant GRACE-1 accelerometer data):

- **GFZ RL05a:** GSM solutions are available for April 2002 until June 2017. Corresponding background GAA, GAB, GAC and GAD products and calibrated errors (GSM\*.txt) have been provided too. **Products for June 2013 till July 2014 and February 2016 have been reprocessed and replaced in the archives (see August 2014 and April 2016 Newsletter).** Further details are listed in the GFZ L2 Release Notes.

GFZ RL05a	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

GFZ provides also full variance-covariance matrices for the whole RL05a time series. These so-called CSM-products are provided to users on request. For more information, please read the 'Release Notes for GFZ GRACE Level-2 Products - version RL05' which are available in the GRACE archives.

Additionally to the standard monthly solutions, GFZ also provides weekly RL05a solutions (aligned to GPS weeks) which contain spherical harmonic coefficients complete up to degree and order 30. Currently, available weekly solutions cover the time span from 2003/01/05 till 2013/07/28. The weekly Level-2 products (GSM + GAX files) can be downloaded at ISDC and PO.DAAC. When making your request at the ISDC retrieval pages, please choose “GFZ Potsdam weekly” as “Processing Facility” to obtain these products. At the PO.DAAC archive, they can be found in the directory “allData/grace/L2/GFZ/RL05\_WEEKLY”. Weekly products can be identified by the string “GW30” instead of “G---“ in the product name.

- **CSR RL05:** GSM solutions for maximum degree and order 60 (incl. calibrated errors GSM\*.txt) and 96 (except for January till March 2015) along with the GAC and GAD background model files are available for the period April 2002 until June 2017. **Products for June 2013 till July 2014 have been reprocessed and replaced in the archives (see August 2014 Newsletter).** Further details are listed in the CSR L2 Release Notes. Ongoing updates on CSR RL05 are provided at <http://www.csr.utexas.edu/grace/RL05.html>.

- **JPL RL05.1:** GSM solutions along with the GAA, GAB, GAC and GAD background model files and calibrated errors (GSM\*.txt) are available for the period April 2002 until June 2017. Details are listed in the JPL L2 Release Notes. **For new release RL05.1 see also comments in the August 2014 Newsletter.**

JPL has released in August 2015 a constrained mascon solution which is now available on the GRACE Tellus website at <http://grace.jpl.nasa.gov/>. A Version 2.0 of the JPL Mascon solution, processed through August 2016, is available at the GRACE Tellus website at <http://grace.jpl.nasa.gov/>.

- Additional L2 comments:
  - GFZ has stopped RL05 processing end of July 2013 (now substituted by RL05a). For

further details see Newsletter October 2013.

- JPL has stopped RL05 processing end of June 2014 (now substituted by RL05.1). For further details see Newsletter August 2014.
- GFZ and CSR have stopped RL04 processing end of April 2012
- JPL has stopped RL04 processing end of January 2012
- GFZ has stopped RL03 processing (Feb 2003 until Jan 2007 available at the archives. For further details refer to the GFZ RL03 release notes for Level-2 products).
- CSR has stopped RL01 processing. (Apr. 2002 until Dec 2006 available at the archives. For further details refer to the CSR RL01 release notes for Level-2 products).
- JPL has stopped RL02 processing (January 2003 until November 2005 available at the archives. For further details refer to the JPL RL02 release notes for Level-2 products).
- TN05/TN07 containing C20 estimates derived from SLR and using GRACE RL04/RL05 standards is periodically updated.

#### **Miscellaneous:**

- The proceedings of all GRACE Science Team Meetings are available at the meeting web sites <http://www.csr.utexas.edu/grace/GSTM/> and <http://www.gfz-potsdam.de/en/grace/gstm/gstm-2016/>.
- Lecture material from the 2011 and 2014 summer schools of the DFG Special Priority Program "Mass transport and mass distribution in the system Earth" can be downloaded at [www.massentransporte.de](http://www.massentransporte.de). Before using, please read the agreements on the cover page.
- The following acknowledgement shall be added to any new GRACE related publication (paper, poster etc.): *Acknowledgement: We would like to thank the German Space Operations Center (GSOC) of the German Aerospace Center (DLR) for providing continuously and nearly 100% of the raw telemetry data of the twin GRACE satellites.*
- A list of GRACE related publications which can be sorted by author or date is available at <http://www.gfz-potsdam.de/en/section/globalgeomonitoringandgravityfield/topics/development-operation-and-analysis-of-gravity-field-satellite-missions/grace/grace-related-publications/>, alternatively the list can be accessed via <http://www.gfz-potsdam.de/en/grace> and one further click on 'GRACE related publications' in the left column. The current status is 1702 papers. This list may be still incomplete. If you are missing a publication please send an e-mail to Frank Flechtner (flechtne@gfz-potsdam.de).
- Science data users are encouraged to submit citations of their own and other works related with GRACE to the bibliography web page implemented at PO.DAAC: <https://grace.jpl.nasa.gov/publications/>.
